

## Paine Field

### Air Service Draft Environmental Assessment

The Draft Environmental Assessment (DEA) on the proposal of Horizon Air and Allegiant Air to begin scheduled commercial passenger airline service at Paine Field was issued on December 4, 2009. The DEA can be viewed at <http://www.paineairport.com/airserviceeea.html>. Public hearings to obtain comments on the DEA were held on January 4, 5 and 21, 2010 and written comments were accepted through February 5, 2010. The written comments and testimony received are being reviewed for the purpose of providing written responses to the public comments. It is anticipated this task will take a minimum of 90 days. The comments and responses to comments will be included in a Final Environmental Assessment. The Final Environmental Assessment may include revisions to the DEA and will include all public comments and responses to those comments. The Final Environmental Assessment will be issued by the Federal Aviation Administration and will be made available to the public on this website as well as in public libraries and at the airport office.
