Paine Field – Snohomish County Airport uses a variety of methods to identify, track, and reduce the impact of aircraft noise on the surrounding communities. Noise comments are managed using a third-party application that correlates each complaint with a specific flight to help airport staff identify the primary causes of noise. The airport does not have the authority to restrict aircraft operations or change aircraft flight paths. Instead, the airport relies on pilots following the published voluntary noise abatement procedures. Several factors may require a pilot to deviate from these procedures including air traffic control instruction or safety considerations. Paine Field – Snohomish County Airport is owned and operated by Snohomish County in compliance with federal aviation regulations. Because the airport operates under the guidance of federal regulations, it's facilities must remain open to users of the national airspace system 24 hours a day, 365 days a year.
